

## 1.What is Automation Testing?

- Software automation testing basically tests any website with automation tools and script and it's so much more accurate than manual testing that is called automation testing. software is a process that checks a website with tools and script automatically that's called automation testing.

## 2.Which Are The Browsers Supported By Selenium Ide?

- The chrome browser version (114) that supported selenium ide. First delete the new version and then download the old version that supports selenium ide. Selenium ide work and open properly.firefox also supports selenium ide but chrome is best for selenium ide.

## 3.What are the benefits of Automation Testing?

- The automation testing is fast and accurate and it avoids mistakes . If any website checks easily and fast it also detects bugs. Manual testing is good but sometimes not fast and not accurate like automation testing. That's why automation testing detects bugs early , one script takes so much time and regression testing is easy for automation testing. Automation testing works so much faster than manual testing and all defect tracks earlier and also customers were satisfied.

## 4.What are the advantages of Selenium?

- The selenium is a free tool for everyone who works with them.
- The selenium supports multiple languages and also works very well.
- The selenium uses any browser and works properly.
- The selenium is a defect track in the very early stages of building software in high quality.
- The selenium's speed is high and it's very accurate for defect tracking.
- The selenium in some criteria without coding you work properly but some criteria.
- The selenium is easy to understand and export files easily.

## 5.Why testers should opt for Selenium and not QTP?

- The tester who tests software in selenium is very accurate.
- Why software tester not use QTP tool
  - QTP(QUICK TEST PROFESSION) is a paid tool only for people who paid.
  - QTP only supports fewer languages.
  - QTP is easy to understand but not accurate like selenium
  - QTP is only support vbscript
  - QTP is only support windows os not other browser use
  - QTP less flexible than selenium
